

Aim:

Write a java program to create a super class called Figure that receives the dimensions of two dimensional objects. It also defines a method called area that computes the area of an object. The program derives two sub-classes from Figure. The first is Rectangle and second is Triangle. Each of the sub classes override area() so that it returns the area of a rectangle and triangle respectively

Source Code:AbstractAreas.java

```
import java.util.*;
abstract class Figure{
    double dim1;
    double dim2;
    double dim3;
    double dim4;
    Figure(double a,double b){
        dim1=a;
        dim2=b;
        dim3=a;
        dim4=b;
    }
    abstract void area();
}
class Triangle extends Figure{
    Triangle(double a,double b)
    {
        super(a,b);
    }
    void area(){
        double Area=(dim3*dim4)/2;
        System.out.println("Triangle:");
        System.out.println("Area is "+Area);
    }
}
class Rectangle extends Figure{
    Rectangle(double a,double b){
        super(a,b);
    }
    void area(){
        double Area=dim1*dim2;
        System.out.println("Rectangle:");
        System.out.println("Area is "+Area);
    }
}
class AbstractAreas{
    public static void main(String args[]){
        System.out.println("Enter length and breadth of Rectangle :");
        Scanner input = new Scanner(System.in);
        double dim1=input.nextDouble();
        double dim2=input.nextDouble();
        System.out.println("Enter height and side of Triangle :");
```

```

Scanner input1=new Scanner(System.in);
double dim3=input1.nextDouble();
double dim4=input1.nextDouble();
Rectangle r=new Rectangle(dim1,dim2);
Triangle t=new Triangle(dim3,dim4);
Figure figuref;
figuref=r;
figuref.area();
figuref=t;
figuref.area();
}
}

```

Execution Results - All test cases have succeeded!

Test Case - 1
User Output
Enter lenght and breadth of Rectangle : 12
14
Enter height and side of Triangle : 7
5
Rectangle:
Area is 168.0
Triangle:
Area is 17.5

Test Case - 2
User Output
Enter lenght and breadth of Rectangle : 4
8
Enter height and side of Triangle : 5
3
Rectangle:
Area is 32.0
Triangle:
Area is 7.5
