2022-2026-CSE-B

## Aim:

Create multiple threads to access the contents of a stack. Synchronize thread to prevent simultaneous access to push and pop operations.

Note: Please don't change the package name.

## Source Code:

```
q29795/StackThreads.java
```

```
package q29795;
import java.util.*;
class NewThread implements Runnable{
   Thread t;
   int n;
   Stack<Integer>STACK = new Stack<Integer>();
   NewThread(int size) {
      n=size;
      t = new Thread(this);
      t.start();
   synchronized public void run()
      STACK.push(n);
      System.out.println(STACK.pop());
   }
}
class StackThreads{
   public static void main(String args[])
      System.out.println("Enter the size of the stack");
      Scanner sc = new Scanner(System.in);
      int k=sc.nextInt();
      for(int i=1;i<=k;i++)</pre>
            NewThread ob = new NewThread(i);
         }
   }
}
```

## Execution Results - All test cases have succeeded!

|                               | Test Case - 1 |
|-------------------------------|---------------|
| User Output                   |               |
| Enter the size of the stack 4 |               |
| 1                             |               |
| 2                             |               |
| 3                             |               |
| 4                             |               |

| Test Case - 2                 |
|-------------------------------|
| User Output                   |
| Enter the size of the stack 9 |
| 1                             |
| 2                             |
| 3                             |
| 4                             |
| 5                             |
| 6                             |
| 7                             |
| 8                             |
| 9                             |
|                               |
